Preface	v
In-situ density measurements in the mesosphere/lower thermosphere region with the TOTAL and CONE instruments	
..... B. Strelnikov, M. Rapp, and F.-J. Lübkin	1
Atomic oxygen measurement by resonance lamp	
..... N. Iwagami and W. H. Morrow	13
Nitric oxide measurement by self-absorbing gas cell	N. Iwagami 17
Imaging attitude finder for a sounding rocket and magnesium ion imager for airglow spatial pattern ... N. Iwagami, Y. Koizumi-Kurihara, and J. Kurihara	21
Airglow photometers on board sounding rockets	
..... B. R. Clemesha, H. Takahashi, A. Eras, N. B. Lisboa, and D. Gobbi	25
N ₂ Temperature of Vibration instrument for sounding rocket observation in the lower thermosphere	J. Kurihara, N. Iwagami, and K.-I. Oyama 33
Foil chaff ejection systems for sounding rocket measurements of neutral winds in the mesopause region	
..... Y. Koizumi-Kurihara, J. Kurihara, Y. Murayama, and K.-I. Oyama	41
Wind measurements: Trimethyl aluminum (TMA) chemical release technique	M. F. Larsen 47
Rocket-borne Lithium ejection system for neutral wind measurement	
..... H. Habu, M. Yamamoto, S. Watanabe, and M. F. Larsen	53
Langmuir probe	T. Abe and K.-I. Oyama 63
Rocket-borne Langmuir probe for plasma density irregularities	H. S. S. Sinha 77
Electron temperature probe	K.-I. Oyama and C. Z. Cheng 91
Impedance probe technique to detect the absolute number density of electrons on-board spacecraft	
..... M. Wakabayashi, T. Suzuki, J. Uemoto, A. Kumamoto, and T. Ono	107
Resonance cone probe for measuring electron density, temperature, drift speed and beam components	A. Piel 125
Retarding Potential Analyzer (RPA) for Sounding Rocket	
..... H. K. Fang and C. Z. Cheng	139
Electric field instrument onboard Japanese sounding rockets	K. Ishisaka 155
Magnetic Field Measurement (MFM) and Sun Aspect Sensor (SAS)	
..... T. Takahashi	165
Designing a toroidal top-hat energy analyzer for low-energy electron measurement	Y. Kazama 181
Low energy particle spectrometer for 3-axis stabilized spacecraft	Y. Saito 193
Imaging thermal ion mass and velocity analyzer	A. W. Yau, E. P. King, P. Amerl, K. Berg, G. Enno, A. Howarth, I. Wevers, and A. White 203
Development of fluxgate magnetometers and applications to the space science missions	
..... A. Matsuoka, M. Shinohara, Y.-M. Tanaka, A. Fujimoto, and K. Iguchi	217
Plasma wave receivers for scientific satellites	H. Kojima 227
Acknowledgments	239
