Preface	ix
---------------	----

Chapter 1: Introduction

1.1 Historical review	1
1.1.1 Natural quartz crystals, birth of crystallography	1
1.1.2 Synthesis of quartz single crystals	2
1.1.3 Previous books on growth and morphology of natural and synthetic quartz crystals	12
1.2 High-temperature and low-temperature quartz, right-handed and left-handed structures	13
1.3 Single crystals and polycrystalline aggregates	16
1.4 Axial setting, indexing and notation of crystal faces	19
1.5 Composition of the book	22

Chapter 2: Growth of Crystals; Basic Concepts

2.1 Ambient phases	25
2.2 Driving force, nucleation and epitaxy	27
2.3 Rough and smooth interfaces and growth mechanisms	31

Chapter 3: Morphology, Perfection and Homogeneity of Polyhedral Single Crystals

3.1 Structural and equilibrium form	37
3.2 Computer-simulated growth forms	41
3.3 Surface microtopography of crystal faces	46
3.4 Physical perfection and chemical homogeneity in single crystals; internal morphology	49

Chapter 4: Growth Conditions and Ambient Phases; Natural and Synthetic Quartz

4.1 Natural quartz	55
4.2 Synthesis of quartz single crystals	59

Chapter 5: Surface Microtopographs and Internal Morphology

5.1 Surface microtopographs of crystal faces, comparison of natural and synthetic crystals	65
5.2 Prism faces	66
5.2.1 First-order prism face, $m\{10-10\}$	66
5.2.2 Second order prism faces, $+X\{11-20\}$ (a) and $-X\{2-1-10\}$ ($'a$) ...	71
5.3 Positive and negative rhombohedral faces, $r\{10-11\}$ and $z\{01-11\}$	72
5.4 Trigonal pyramid $s\{11-21\}$ and trigonal trapezohedron $x\{51-61\}$ faces ..	78
5.5 $S\{11-22\}$ face	79
5.6 Basal faces, $\{0001\}$	80

Chapter 6: Morphology of Natural Quartz Crystals

6.1 Single crystals	85
6.1.1 Various forms	85
6.1.2 Aspect ratio	96
6.1.3 Development of $\{10-11\}$ and $\{01-11\}$ faces	97
6.1.4 Split growth	99
6.1.5 Appearance of basal faces on natural quartz crystals	100
6.1.6 Scepter, skeletal, cathedral quartz and related morphologies	102
6.1.7 Twisted (Gwindel) quartz, and faden, sub-parallel platy quartz ...	109
6.1.8 High-temperature quartz	110
6.2 Twinned crystals	111
6.2.1 Requirement for twinning	111
6.2.2 Dauphiné law twin	113
6.2.3 Japan law twin	114
6.2.4 Brazil law twin	125

Chapter 7: Synthetic Quartz

7.1 History of quartz synthesis, from laboratory to industry	133
7.2 Growth rate anisotropy and computer simulated morphology of synthetic quartz	140

Chapter 8: Texture Formation in Chalcedony

8.1 Chalcedony, fine-grained polycrystalline aggregates of quartz	161
8.2 Textures of chalcedony in geode	162
8.3 Mechanism of precipitation of fine-grained quartz in geode	174

Chapter 9: Opal

9.1 Natural opal, modes of occurrence, and structure	177
9.2 Synthesis of opal	181
References	185
Index	195
