

INDEX

- acceleration, 32, 41, 49
- acceleration efficiency, 157, 158, 164, 165
- acceleration mechanism, 136, 162, 165, 203, 222, 281, 289, 400
- acceleration of cosmic rays, 157, 222
- acceleration region, 162, 166
- active galactic nuclei, 413
- age of cosmic rays, 33, 44
- age of the universe, 441
- Alfvén velocity, 369
- Alfvén-Mach number, 369
- ⁴⁰Ar, 399
- ²⁶Al, 147, 409
- Andromeda nebula, 187
- anisotropic diffusion, 319
- anisotropy, 137
- anomalous absorption, 5
- antenna, 171
- antenna temperature, 173
- anti-matter, 423
- anti-neutron, 449
- anti-proton, 152, 444
- aperture synthesis, 174
- approximation A, 110
- approximation B, 110
- Aroos, 407
- asteroid belt, 402
- asymptotic direction, 311
- atmospheric effect, 307
- aurora, 370, 381, 396

- baryon number, 422
- ¹⁰Be, 44, 48, 146, 149, 191, 194, 396
- ¹⁰Be dating, 399
- beta-decay, 154
- betatron acceleration, 291, 360
- Bethe-Bloch formula, 7
- Bethe-Heitler formula, 6, 7
- BF₃ counter, 242
- big bang cosmology, 414, 428
- black hole, 209, 447

- black-body radiation, 73, 91
- black-body temperature, 173
- black-body type model, 244
- bremsstrahlung, 7, 100, 106, 113, 191, 223, 233
- brightness temperature, 173, 179

- calorimeter, 134
- carbon-burning reaction, 159
- ¹⁴C, 387
- ¹⁴C concentration, 390, 393, 395, 396
- ¹⁴C dating, 387, 388, 411
- carbonaceous chondrite, 286, 405
- cascade shower, 9, 189, 233
- Centaurus, 251
- central core, 258
- Chapman-Ferraro model, 12
- chemical composition, 14, 22, 32, 33, 34, 50, 126, 136, 139, 143, 155, 191, 222, 253, 278, 400, 451
- Cherenkov radiation, 117
- ³⁶Cl, 147
- closed model, 139, 145
- CNO cycle, 159
- co-rotation effect, 320
- ⁵⁶Co, 409
- ⁵⁷Co, 165
- coincidence method, 4
- compact radio source, 175
- Compton scattering, 5, 80, 429
- Compton-Getting effect, 314, 332, 431
- confinement, 141, 143
- coronal hole, 27, 328
- COS-B satellite, 224, 228
- cosmic blackbody radiation, 431
- cosmic dust, 182, 385, 410
- cosmic electron, 189
- cosmic radio emission, 173
- cosmic ray age of meteorite, 402
- cosmic ray astrophysics, 452
- cosmic ray density, 43

- cosmic ray fluctuation, 332
- cosmic ray irradiation, 402, 404
- cosmic-ray-irradiated age, 404
- cosmogenic nuclide, 385, 402, 409
- cosmology, 32, 413
- Coulomb interaction, 97
- CP symmetry, 446
- Crab nebula, 16, 29, 35, 39, 44, 88, 164, 180, 194, 205, 214, 224, 230
- cross-section, 66
- CsI-scintillator, 132
- cyclotron radiation, 85
- Cygnus loop, 220

- decoupling of neutrino, 425
- deuteron, 286
- differential rotation of the sun, 315
- diffuse components of X-ray, 209
- diffuse gamma-ray emission, 224
- diffuse X-ray, 210
- diffusion convection model, 321
- diffusion equation, 140
- diffusion process, 293
- diffusion-convection model, 320
- dispersion measure (DM), 181
- diurnal variation, 314, 321, 332
- Dolidze belt, 226
- Doppler effect, 185, 353, 414
- Doppler shift, 70
- drift motion, 339
- DUMAND (Deep Underwater Muon and Neutrino Detection), 41, 235, 446
- dynamic spectrum, 276

- earth's magnetosphere, 300, 335, 370
- east-west effect, 4, 54
- Eddington limit, 79
- Einstein equation, 416
- electric double layer, 375, 378
- electromagnetic acceleration, 162
- electromagnetic cascade shower, 254, 437
- electromagnetic component, 233
- electromagnetic interaction, 63
- electron, 147
- electron component, 254
- electron shower, 110
- electrostatic shock wave, 377, 380
- 11-year periodicity, 315
- emissivity of gamma-ray, 227, 230
- emulsion chamber, 151
- energy loss process of cosmic electron, 190
- energy spectrum, 33, 133, 136, 236, 253, 289, 437, 451

- energy spectrum of cosmic electron, 191
- enhancement factor, 36
- eruptive fluid model, 244
- etching, 132
- evaporation of black hole, 448
- expanding universe, 413
- expansion of the universe, 431
- explosive phase of solar flare, 272
- extensive air shower, 22, 26, 56, 234, 237, 252

- fall-out age, 407
- Faraday rotation, 181, 183
- ⁵⁵Fe, 409
- Fermi acceleration, 162, 222, 290, 344
- Fermi mechanism, 14, 15, 164, 201
- Feynmann variable, 245
- fire-ball model, 244
- first adiabatic invariant, 360
- first ionization potential, 156, 281
- first order Fermi acceleration, 290, 360
- fly's eye, 235
- Fokker-Planck equation, 333
- Forbush decrease, 11, 53, 299, 321, 323, 332
- 4 kpc arm, 188, 189
- free-free absorption, 105, 108
- free-free transition radiation, 100
- frozen-in principle, 14, 340, 362

- galactic center, 169, 175, 188, 224, 228
- galactic corona, 193
- galactic disk, 169, 175, 224
- galactic gamma-ray, 18
- galactic magnetic field, 25, 41, 182, 183, 190
- Galaxy, 24, 88, 129, 137, 169, 187, 210, 400, 431
- gamma ray line emission, 276, 283
- gamma-ray astronomy, 17, 18, 223
- gamma-ray burst, 19, 115
- gamma-ray source, 224, 230
- gauge boson, 421, 423
- gauge theory, 419
- generalized Ohmic law, 341
- geomagnetic effect, 54, 311, 392
- geomagnetic field, 134, 390
- geomagnetic secular variation, 390
- geomagnetic storm, 323
- giant sequoia, 390
- globular cluster, 169
- GM counter, 300
- Goeld belt, 226, 228
- grand unified theory, 17, 422
